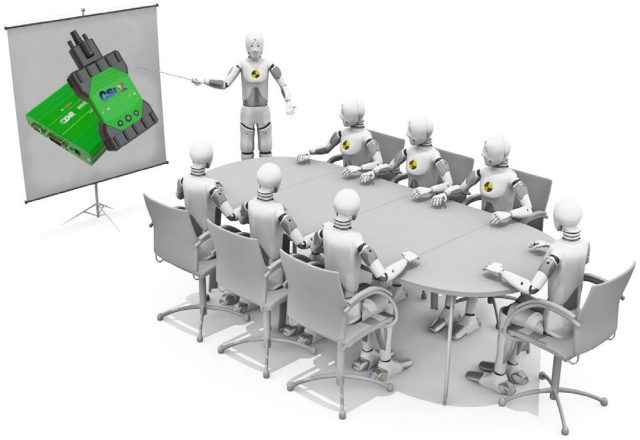
CDR Tool Technician Train The Trainer Course

This very specialized training course is only open to those who have completed the Collision Safety Institute CDR Tool Data Analyst and the CSI CDR Tool Technician Courses in the past three years or are already CSI licensed Technician Trainer Mentors looking to renew their training license. No other "operator's" or on-line technician courses qualify. *After all, one can't teach a course that they haven't already attended, right?*

This CDR Technician Course Train-the-Trainer Course is an opportunity for qualified and experienced CDR Tool Data Analysts to train others to the Technician level. This course provides qualified individuals with an opportunity to teach the two-to-three-day CSI CDR Technician Course. It does *not* qualify one to teach the CDR Data Analyst Course.



The CDR Technician Train-The-Trainer program includes…

- a renewed *focus on the CDR2 application and process*
- the Bosch CDR Tool Technician course material
- the Tesla EDR Technician Course material
- the Hyundai and Kia EDR Tool Technician Course materials
- course handouts
- instructor PowerPoints instructor notes
- Exams and exam keys
- additional handout material for the Trainer to distribute to those attending their course

Those who successfully complete this course will be provided with a training materials thumb drive personalized for that specific individual to teach the CDR Tool Technician level course. That material cannot be changed or used in conjunction with some other crash data related course offering and is licensed specifically to the individual instructor and for a 2-year period. This policy ensures that the Technician level course material presented is consistent and current each time it is offered. Periodic updates will be made available to licensed trainers as the Technician course materials and/or CDR Tool software is updated during the term of the license.

The next CSI Train-The-Trainer course will only be offered in conjunction with the EDR User's Summit.

Visit www.EDRSummit.com for registration details for both the Technician Train-The-Trainer Program and the EDR User's Summit

CDR Tool Technician courses may be found separately at the Events tab at TheCrashHub.com
